

Sioux Cleaners Superior to Pressure Washers

RENT STEAM CLEANERS TO YOUR CUSTOMERS

For cleaning grease, oil, wax or sticky substances, a Sioux Steam Cleaner will outclean a pressure washer. A Sioux Steam Cleaner will dissolve and melt greases and oils, instead of just spraying them around on the cleaning surface.

Unlike conventional pressure washers, steam sanitizes and disinfects, decontaminates hazardous sites, killing algae and bacteria without chemicals.

Sioux Model S2.7D250 delivers 2.7 GPM (gallons per minute) of 320° F saturated steam. Producing steam in just minutes, this unit features stainless steel coilwrap, adjustable detergent system, solid molded-rubber casters, shut-off gun and 50' of hose.

In addition, a steam cleaner (vs. a hot washer) offers the following benefits:

- Operates with less power consumption, **reducing your electric bill**
- Requires a smaller electric circuit for installation, and therefore, **may be used in more locations in your facility**
- Uses less water during operation, **reducing your water and sewer bills, and reducing the volume of wastewater to be processed.**
- Produces less splattering and splash-back, **protecting the operator and your facility**

In addition to profitable rentals, the Sioux S2.7D250 is great to have around your rental yard to wash down rental equipment and facilities. It is great for cleaning and degreasing returned rental equipment, de-icing frozen valves, pipes and equipment, as well as cleaning and maintaining your rental facility.

APPLICATIONS

	STEAM CLEANER	HOT PRESSURE WASHER	COLD PRESSURE WASHER	COMBINATION STEAM & HOT PRESSURE
Degrease engine blocks, motors & fans	X			X
Wash concrete & debris from concrete forms, mixers & plant equipment		X	X	X
